Whilst the contents of the typical book in this area is professional-course driven and heavily technical, this text provides a better balance between technical and non-technical content, which much better meets the need of the undergraduate, particularly the non-accounting student. Management Accounting is substantial in content but is not of an intimidating size. It offers a range of questions and answers specially written for the book, not reproduced from professional past papers. The support package is comprehensive and innovative, consisting of Power Point presentations, OHT masters, solutions and an MCQ testbank. 640 pp. Englisch.
