THE sense of color and the sense of proportion are carefully developed by art teachers, but the perspective sense is largely allowed to take care of itself. By the perspective sense is meant a perception of the relation existing between straight lines-their apparent convergence, direction, length and position; a realization of what is meant by systems of lines (lines that have the same direction); and the ability to think of systems instead of individual lines. The lack of the perspective sense, on the part of a draftsman, is as apparent in his work, to one who has it, as the lack of the color sense is apparent to one who sees and appreciates color. Students are prone, in drawing, to draw a line here and another there-one line of a system, then a line of another system-trusting to their sense of proportion alone to bring the drawing out correct in the end. Asked to draw the interior of a room, or a street scene, the student sees only a maze of lines because his ability to grasp the perspective...
